

A photograph of an offshore oil rig deck at sunset. Two workers in white hard hats and safety vests are visible. One worker is in the foreground, looking towards the right, while another is further back. A large piece of machinery is on the left, and a red buoy is visible in the water. The sun is low on the horizon, creating a bright glow and lens flare.

# Emergency Response

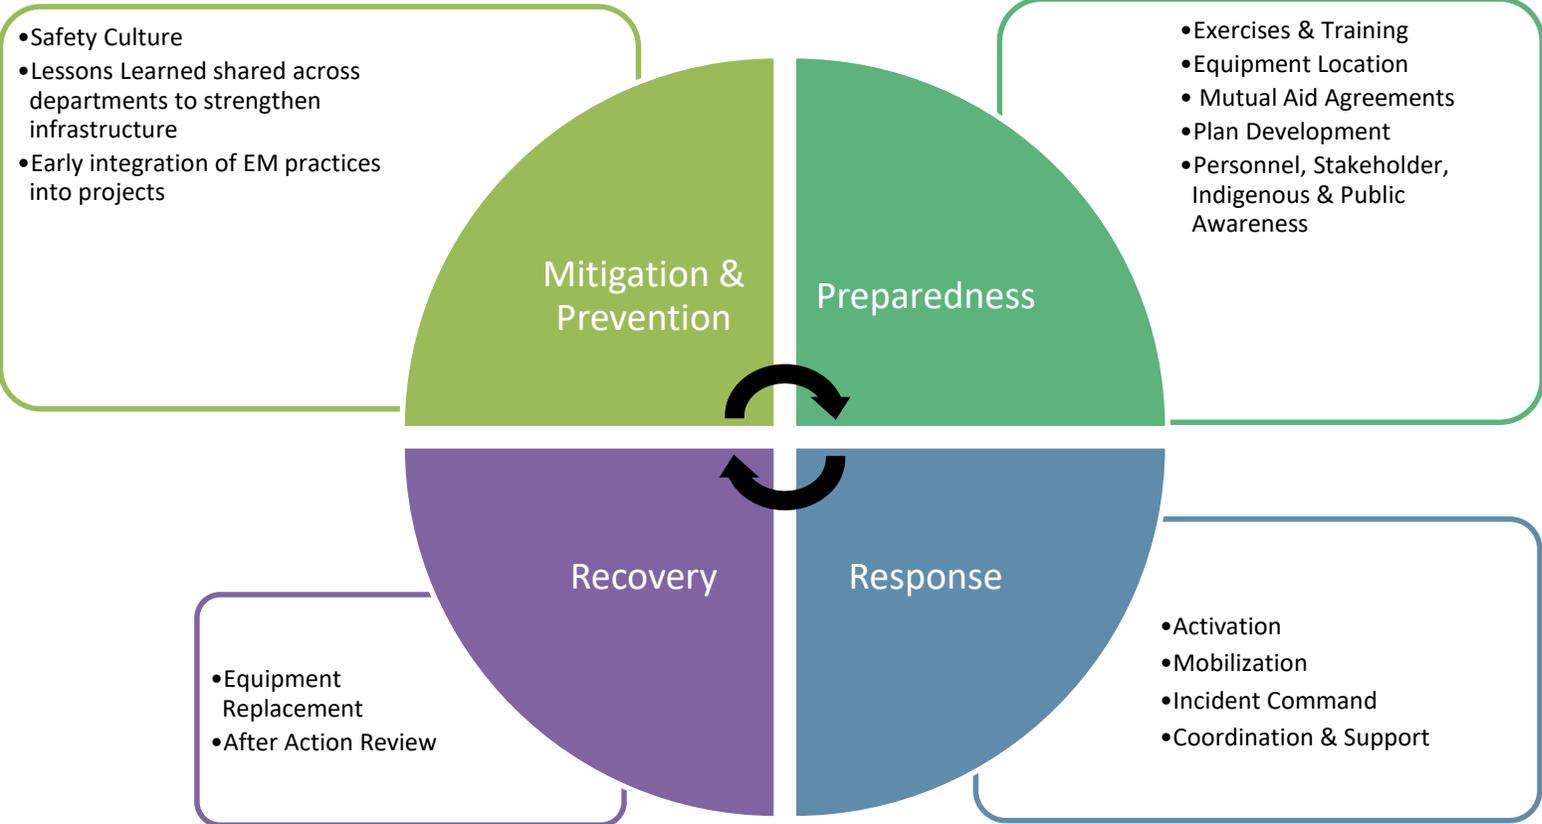

IAMC Presentation on Emergency Management

# Agenda

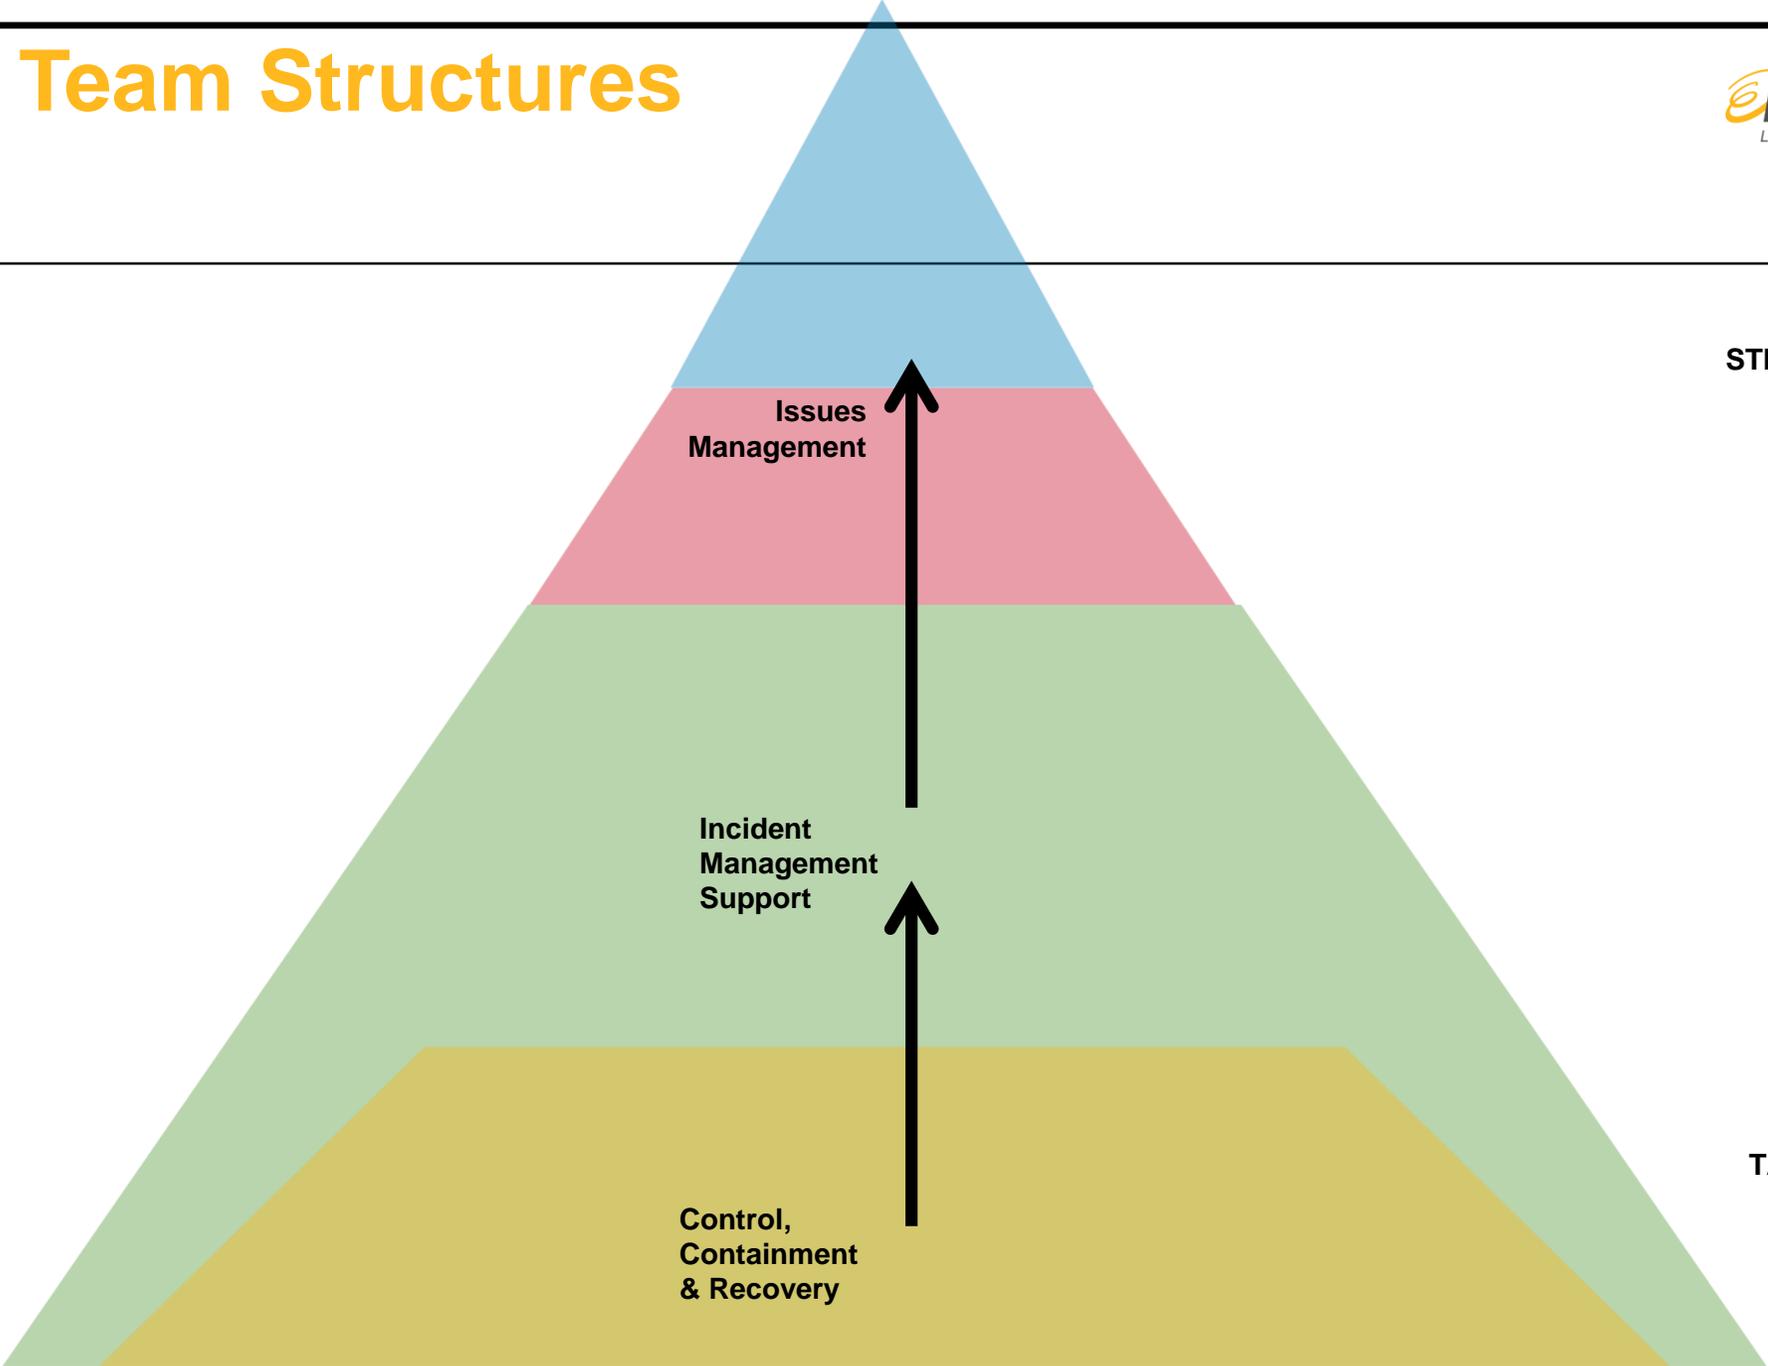

- Overview
- Planning
- Training
- Exercise Program
- ER Equipment
- Capabilities
- Response

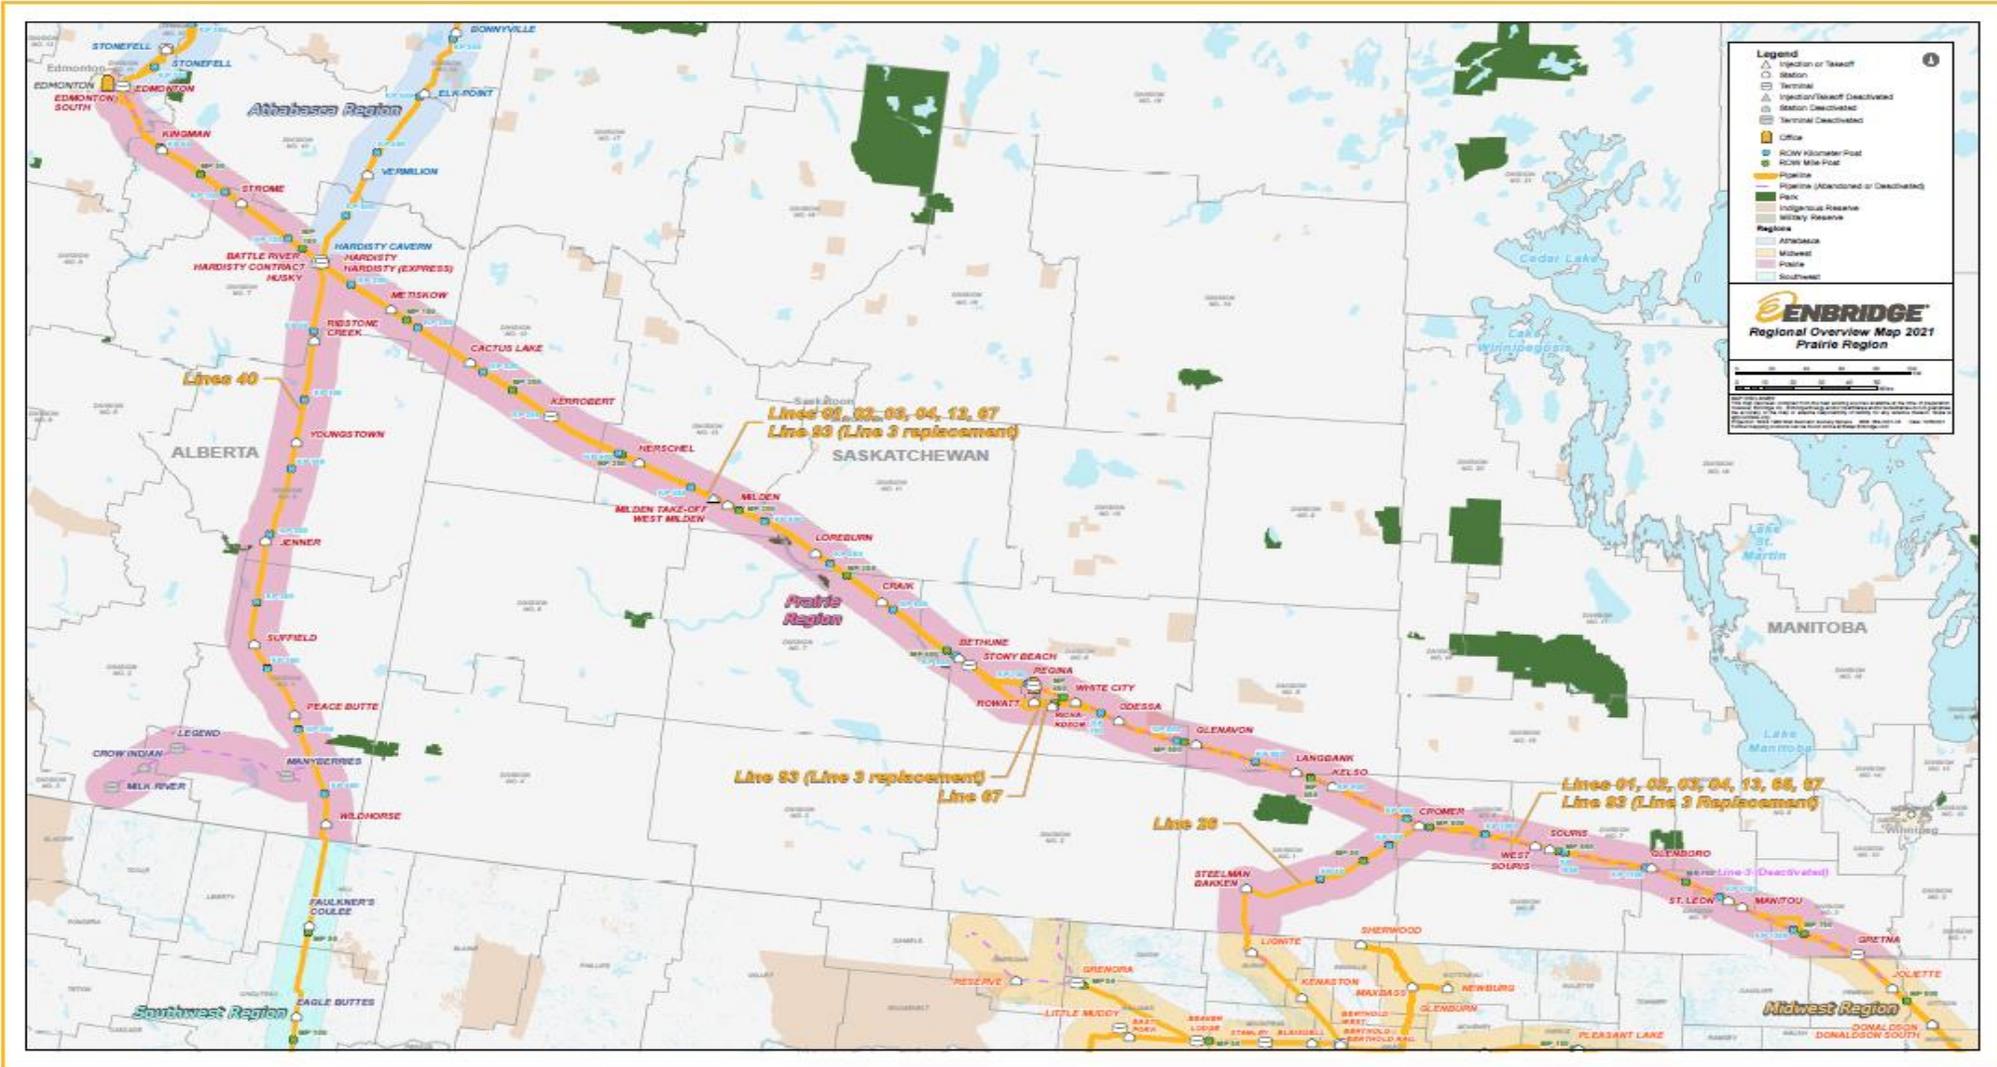

# Emergency Management Overview

# Response Team Structures

# Regional Overview Map

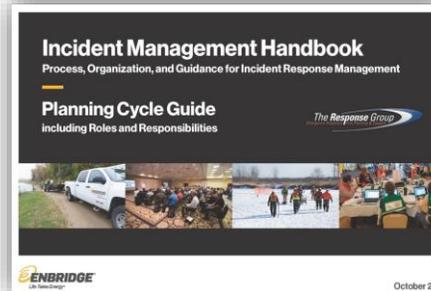

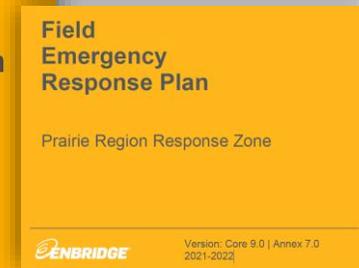

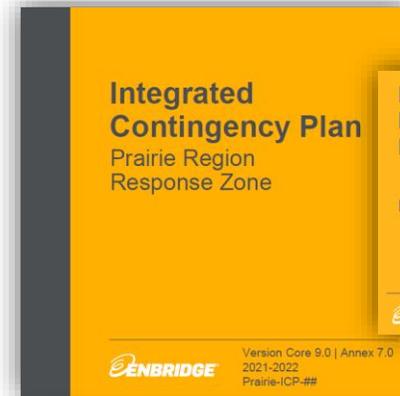

# Response Plan Coverage

## Integrated Contingency Plan

- Guides Corporate and Regional Response process / Annexes specific to region
- Includes condensed Field Emergency Response Plan for Responders

## Additional Guides

- Inland Spill Response Tactics Guide
- Control Point Mapping
- Incident Management Handbook

# ER Training

- Incident Command System (ICS) Awareness:
  - Integrated Contingency Plan/ER Plan
  - ICS organizations, roles
- Boat Operator
- Boom/Skimmer operations
  - Booming strategies/tactics
- ER Responder Awareness:
  - Defining a reportable emergency/how to report
  - Hazard ID
- ICS training (100-300, role-specific)

---

# Enbridge Exercise Program

## Exercise types

---

- Internal Notification Exercises (annually)
- Discussion-based Tabletop Exercise (annually)
- Unannounced Exercise (annually)
- Equipment Deployment Exercise (annually)
- Combined Command Post & Equipment Deployment Exercise (every 3 years)
- Security Exercise (annually)
- Environment Canada-required exercise (annually)

# Prairie Region 2021 Exercise Details

AB, SK, MB

- Internal Enbridge Notification Exercises: 4
- Equipment Deployment Exercises: 10
- Environment Canada-required exercise: 1
- Discussion-based Tabletop Exercise: 5
- Command Post Exercise: 2
- Security Exercises: 4

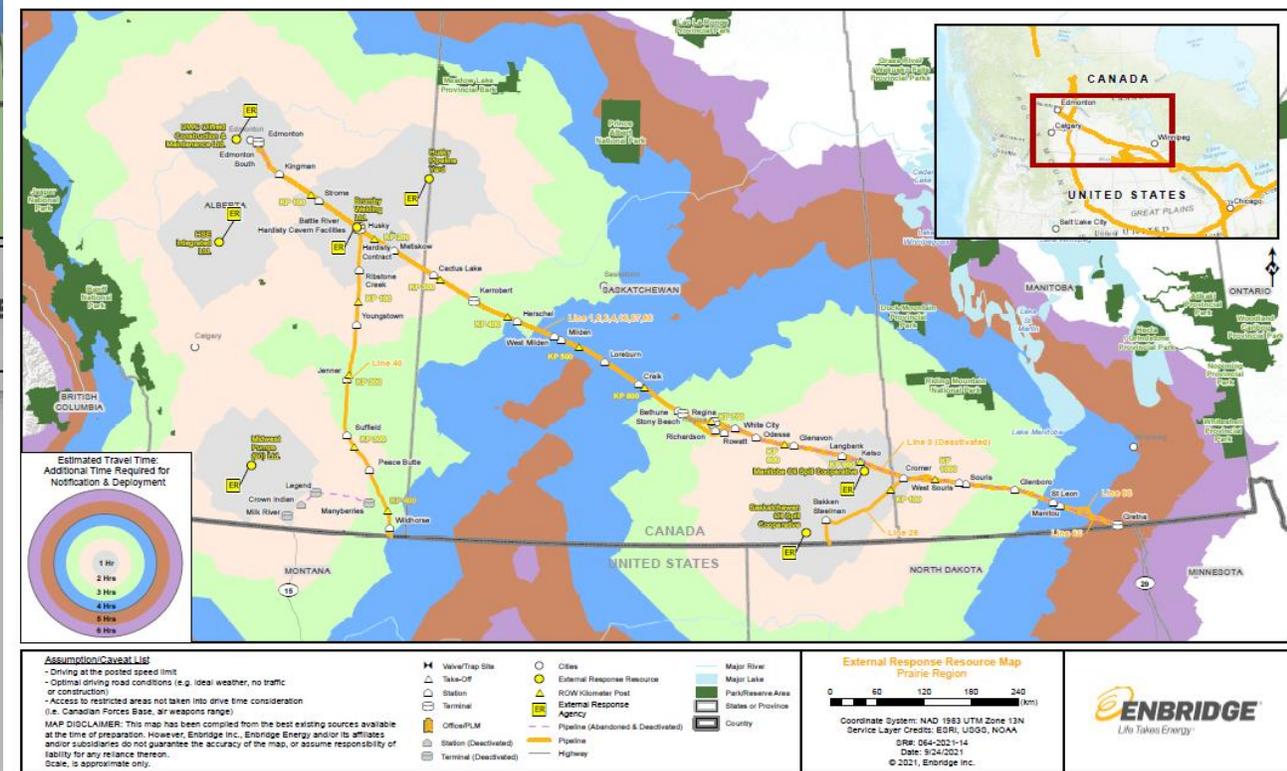

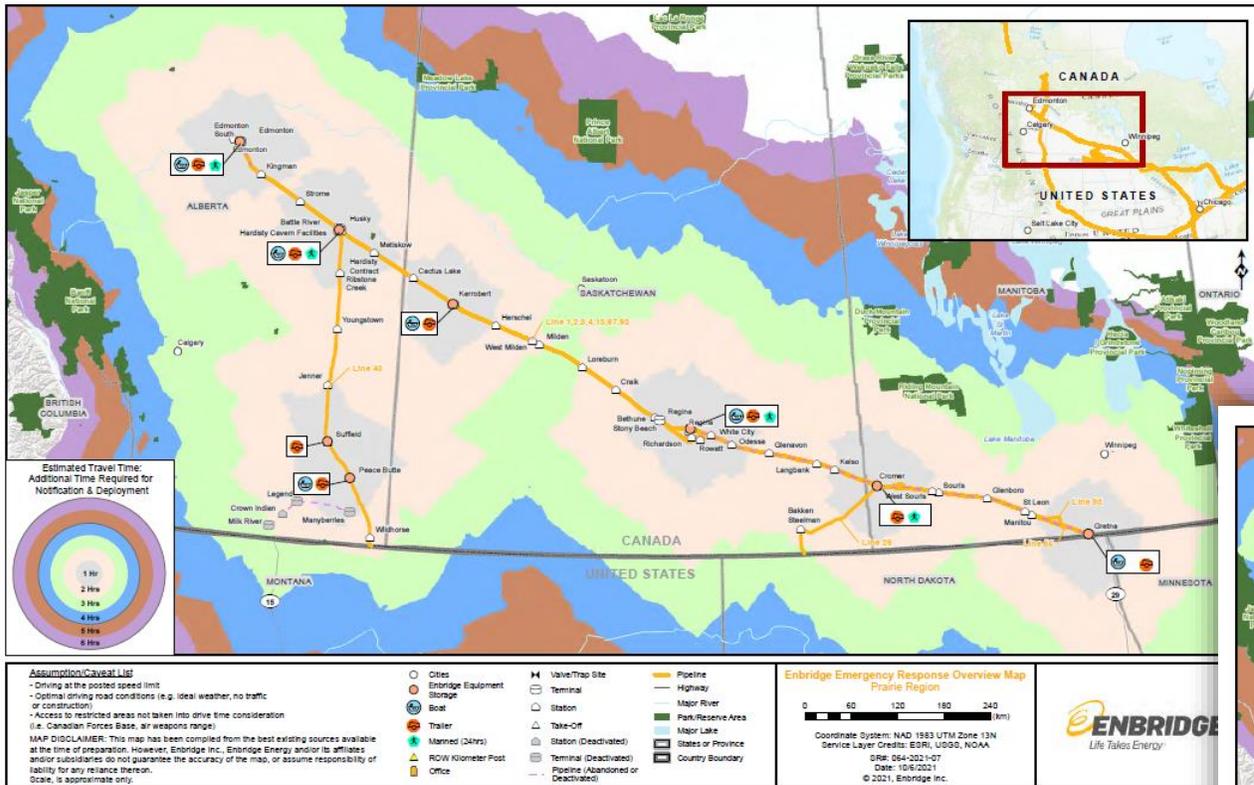

# Emergency Response Equipment Overview

- Each location has a cache of Emergency Response Equipment **dedicated** to response operations.
- Each asset has smaller equipment associated with it as well as equipment that is used for daily operations that may be utilized in a response; UTV/ATVs, dozers, excavators, etc.

# Incident Command System

## Functional Roles & Responsibilities

# Incident Command System

## “Unified Command”

### Unified Command Overview

#### Description of the Unified Command (UC)

The UC is a structure that brings together the “ICs” of all major organizations that have jurisdictional authority for the incident to coordinate an effective response while carrying out their own organization’s jurisdictional responsibilities. A UC links responding organizations to the incident and provides them a forum to make decisions together. Under a UC, organizations should blend together throughout the ICS organization to create an integrated response team. The UC is responsible for overall management of an incident. The UC directs incident activities including the development and implementation of incident objectives, strategies, and approves ordering and releasing of resources.

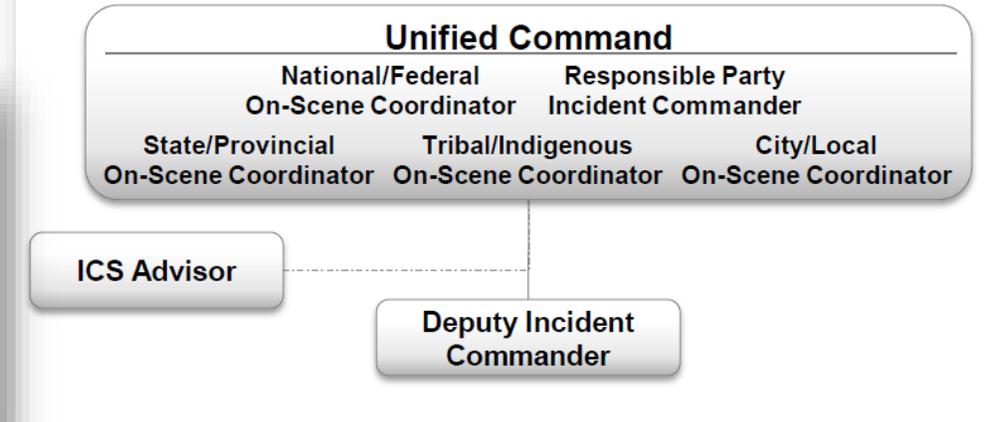

#### Why Establish a Unified Command (UC)?

- Cross state/province boundaries (e.g., two states, provincial or international boundaries).
- Involve various governmental levels (e.g., federal, state, indigenous, and local).
- Involve a facility (e.g., Responsible Party (RP) for a pollution threat).
- Involve a private industry.
- Impact multiple functional responsibilities (e.g., search and rescue (SAR), fire, oil spill, and emergency medical services (EMS)).

#### Unified Command (UC) Composition

- Must have jurisdictional authority or functional responsibility under a law or ordinance for the incident.
  - Must have incident or response operations impact on the organization’s area of responsibility (AOR).
  - Must be specifically charged by law or ordinance with commanding, coordinating, or managing a major aspect of the incident response.
  - Should have full organization authority to make decisions and execute all of the tasks assigned to the IC on behalf of their organization.
  - Should have the resources to support participation in the response organization.
- In order to keep the UC limited in size, and therefore efficient, it is recommended that one federal agency be the lead agency to coordinate activities and actions among the various federal agencies involved; this concept applies to State, Provincial, Indigenous Communities/Tribes, Indigenous People representation on the UC as well.

### Unified Command Section Organization

# How Enbridge Responds

## Concurrent Activities

### Incident Observation

- The public; or
- Enbridge Employee; or
- Local First Responder; or
- Control Centre

### Region Contacted

- Control Centre contacts regional 24/7 contact;
- Local first responders called

### Response

- Regional on-call deploys Enbridge first responder;
- External agencies notified concurrently;
- Enbridge senior leadership notified;
- Incident Command System activated

### Strategic Support

- Enbridge executive leadership notified
